

Simube QR2 Ultra Firmware Upgrade Guide

1. Prepare the Device

Unscrew the three fasteners holding the PCB in place as shown in Figure 1.

(Figure 1)

2. Launch the Update Application

Run the application S_Assistant provided by us on your computer, as shown in Figure 2.

(Figure 2)

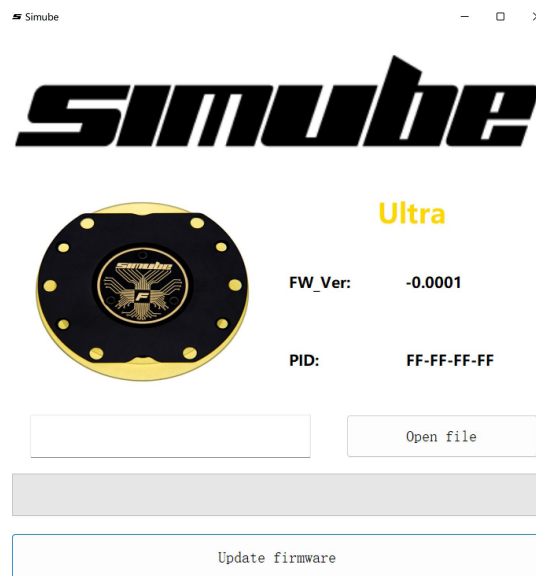

3. Connect the Device

Use a USB data cable to connect the QR2Ultra device to your PC (we recommend using the USB cable supplied by Fanatec) as shown in Figure 3.

Once connected, the application will display the detected device as shown in Figure 4.

(Figure 3)

(Figure 4)

4. Update the Firmware

Click "Open File", select the latest firmware file we have provided, and then click "Update Firmware".

Wait until the progress bar reaches completion and you see the message "Flash Update Success", as illustrated in Figure 5.

You may now safely disconnect the USB cable.
Note: Do not perform any other operations during the update process to avoid upgrade failure.
